

Subject Index to Volume 10

A

- A23187 ionophore, 235-240, 241-253, 477-490
- Adipocytes, effects of hormones on cytosolic free calcium in, 561-567
- Adrenal chromaffin cells (bovine), internal calcium mobilization and secretion, 213-221
- Adrenoceptor (alpha) agonists on calcium in adipocytes, 561-567
- Adrenoceptor (beta) activation, does it stimulate Ca^{2+} mobilization and inositol trisphosphate formation in parotid acinar cells, 519-525
- Adriamycin, cancer chemotherapy, 63-70
- Angiotensin II, 47-56
- Annexin family of calcium-binding proteins, 1-10
- Arginine mediated insulin release, 441-450
- Arginine vasopressin, 47-56
- Astrocytoma cells and correction for extracellular Fura-2 fluorescence using Mn^{2+} and probenecid, 171-180
- ATP on cytosolic free calcium in adipocytes, 561-567
- ATPase ($\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent) of SV40 transformed WI38 lung fibroblasts, 181-187
- Atrial cells (frog), two calcium currents, 499-508

B

- BAPTA-type calcium buffers, 491-498
- Barium inhibition of inositol trisphosphate induced calcium release in thymocyte microsomes,

451-455

- BAY K 8644, Ca^{2+} -channel activator, 37-46
- b-BCH mediated insulin release, 441-450
- 8-Bromo-cAMP, 205-211

C

- Caffeine and myoplasmic calcium measurements, 151-158
- Calbindin-D9K and calmodulin in intestinal calcium absorption, 189-203
- Calciosomes, a sarcoplasmic reticulum-like organelle, from human neutrophils and HL60 cells, 351-361
- Calcitonin inhibits the rise of intracellular calcium induced by thyrotropin-releasing hormone in GH₃ cells, 145-149
- Calcium binding proteins, 1-10
- calciosomes, 351-361
- synthesis, calpactin I and calelectrins, 135-144
- model phospholipid vesicles, 71-79
- Calcium buffers, BAPTA-type, 491-498
- Calcium channel activator, BAY K 8644, effect on gall-bladder epithelial cells, 37-46
- Calcium currents (two) in single frog atrial currents, 499-508
- Calcium ion transients induced by thapsigargin in human neutrophils, 477-490
- Calcium ionophore A23187, 235-240, 241-253, 477-490
- Calcium mobilization, is it stimulated by

- beta-adrenoceptor activation, 519-525
- Calcium movement, sites and mechanisms in non-excitable cells, 265-273
- Calcium pools (non-mitochondrial), phosphoinositide-sensitive and insensitive, and modulation of intracellular free calcium, 325-336
- Calcium pump
cardiac sarcoplasmic reticulum (Review), covalent regulation of, 397-400
mechanism in endoplasmic reticulum of liver and phosphoproteins as reaction intermediates, 275-287
- Calcium release
channel, from sarcoplasmic reticulum modulated by adriamycin and other drugs, 63-70
induced by inositol trisphosphate in thymocyte microsomes. Inhibition by barium and strontium, 451-455
- Calcium signalling non-excitable cells, notes on oscillations and store refilling, 385-395
- Calcium/calmodulin
-dependent protein phosphatase in bovine parotid gland, purification and characterization, 457-466
-sensitive inositol trisphosphate kinase from bovine parathyroid, 543-550
- Calelectrins, 135-144
- Calmidazolium and fibroblast $\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent ATPase, 181-187
- Calmodulin
antagonism by compound 48/80, 93-99
antagonists and fibroblast $\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent ATPase, 181-187
calbindin-D9K in intestinal calcium absorption, and, 189-203
involvement in cell volume recovery from hypo-osmotic stress, 159-169
- Calmodulin/calcium
-dependent protein phosphatase in bovine parotid gland, purification and characterization, 457-466
-sensitive inositol trisphosphate from bovine parathyroid, 543-550
- Calpactin I, 135-144
- Calsequestrin from muscle cells, 351-361
- cAMP raises cytoplasmic calcium in pancreatic

- alpha-2-cells by mobilizing calcium incorporated in response to glucose, 205-211
- Carbachol, 171-180, 205-211
- Cell calcium homeostasis in non-excitable cells, collected papers and reviews, 265-395
- Cell division triggered by calcium flux at the termination of replication in *Escherichia coli*, 511-517
- Chlorpromazine and derivatives, 159-169
- Chondrocytes, 29-35
- Clonidine, 205-211
- Colchicine inhibition of cell spreading, 135-144
- Compound 48/80, histamine release and calmodulin antagonism, 93-99
- Cytochalasin D inhibition of mammary cell spreading, 135-144

D

- Dantrolene, 223-233
- Doxorubicin and ruthenium red effects on intracellular Ca^{2+} stores in skinned rabbit mesenteric smooth-muscle fibres, 433-439

E

- Endoplasmic reticulum
activation of calcium signalling mechanisms in, by GTP and inositol trisphosphate 363-374
membranes, effects of GTP on calcium movements, 343-350
- Endotoxemia and alterations in inositol trisphosphate binding to subcellular structures of rat liver, 425-432
- Epinephrine, 205-211
- Epithelial (mammary) cell spreading, and calcium-binding protein synthesis, 135-144
- Escherichia coli*
cell division triggered by calcium flux at the termination of replication, 511-517
endotoxin administration and inositol trisphosphate binding, 425-432

F

- Fibroblasts (lung), SV40 transformed, and $\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent ATPase, 181-187
- Fluorescent probes, optimal spectral windows to minimize quantum noise of ratiometric

- intracellular, 527-534
 Fluorescent probes, quantitation of sperm
 cytoplasmic calcium, 241-253
 Forskolin, 205-211

G

- Gall-bladder epithelial cells, 37-46
 Glibenclamide mediated insulin release, 441-450
 Glucagon release modulators, 205-211
 Glucose
 calcium incorporated in response to, 205-211
 effects on cytosolic free calcium and inositol
 lipid metabolism in the insulin-secreting
 HIT-T15 cell line, 535-541
 induced changes in cytoplasmic free Ca^{2+}
 concentrations and effects on insulin release,
 17-27
 GTP
 activation of calcium signalling mechanisms in
 endoplasmic reticulum, 363-374
 calcium movements endoplasmic reticulum
 membranes, 343-350

H

- Halothane, myoplasmic calcium measurements,
 151-158
 Heart cells (rat), quality and yield, 57-62
 Histamine release induction by compound 48/80,
 93-99
 HL-60 cells and calciosomes, 351-361
 Homeostasis, cell calcium, in non-excitable cells,
 collected papers and reviews, 265-395
 Hormones, effects of, on cytosolic free calcium in
 adipocytes, 561-567
 Hypo-osmotic stress, cell volume recovery from
 and calmodulin involvement, 159-169

I

- Inositol lipid metabolism in the insulin-secreting
 HIT-T15 cell line, effects of glucose on,
 535-541
 Inositol tetrakisphosphate and its role in
 receptor-mediated control of calcium
 mobilization, 375-383
 Inositol trisphosphate
 activation of calcium signalling mechanisms in

- endoplasmic reticulum, 363-374
 binding alterations to subcellular structures of
 rat liver during chronic endotoxemia, 425-432
 formation in parotid acinar cells, is it
 stimulated by beta-adrenoceptor activation,
 519-525
 induced calcium release in thymocyte
 microsomes. Inhibition by barium and
 strontium, 451-455
 kinase from bovine parathyroid, 543-550
 receptor from brain, isolation and functional
 characterisation, 337-342
 releasable calcium store and calciosomes,
 351-361
 -sensitive calcium store in adrenal chromaffin
 cells, 213-221

Insulin release

- pancreatic islets of fetal rats mediated by
 leucine b-BCH, tolbutamide, glibenclamide,
 arginine, potassium chloride and theophylline
 does not require stimulation of Ca^{2+} net
 uptake, 441-450
 glucose induced, 17-27
 Insulin-secreting HIT-T15 cell line, 535-541
 Ionomycin, 241-253
 release of calcium from the sarcoplasmic
 reticulum and activates Na/Ca exchange in
 vascular smooth muscle cells, 125-134
 Isoprenaline, 519-525
 Isoproterenol, 205-211

L

- Lanthanum and fibroblast $\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent
 ATPase, 181-187
 Leucine mediated insulin release, 441-450
 Leukocyte (polymorphonuclear) stimulation by
 dicyclohexylcarbodiimide (DCCD), 115-124

M

- Magnesium ions with parvalbumin and liposomes,
 71-79
 Malignant hyperthermia, 151-158, 223-233
 Manganese ions
 entry induced by thapsigargin in human
 neutrophils, 477-490
 corrections of Fura-2 measurements, and,
 171-180

- parathyroid, 11-15
 Microsomes (thymocyte) and inositol trisphosphate induced calcium release, 451-455
 Mitogenesis, platelet-derived growth factor in chondrocytes, 29-35
 Monoclonal antiparathyroid antibody interaction with Ca^{2+} agonistic actions of Mn^{2+} in normal human parathyroid cells, 11-15
 Muscle cells, human skeletal, use of Fura-2 probe, 151-158
 Myoplasmic calcium measurements, 151-158

N

- Neuroleptic malignant syndrome, sarcoplasmic ionic calcium concentration in, 223-233
 Neutrophil stimulation by DCCD, 115-124
 Neutrophils (human), calcium transients and manganese entry induced by thapsigargin, 477-490
 Neutrophils and calciosomes, 351-361
 Nicotine, 213-221
 Non-excitable cells, cell calcium homeostasis, collected papers and reviews, 265-395

O

- Oxytocin on calcium in adipocytes, 561-567

P

- Pancreatic acini (rat), influence of thyroid status on Ca^{2+} mobilization and amylase secretion in, 551-560
 Pancreatic alpha-2-cells, cAMP raises cytoplasmic calcium in, 205-211
 Pancreatic beta-cells, 17-27
 Pancreatic enzyme secretion, augmentation of phorbol ester-stimulated, 255-262
 Pancreatic islets (fetal rat) and the release of insulin, 441-450
 Pancreatic islets of fetal rats, insulin release from, 441-450
 Parathyroid (bovine) calcium/calmodulin-sensitive inositol trisphosphate kinase, 543-550
 Parathyroid cells, Ca^{2+} agonistic actions of Mn^{2+} , 11-15

- Parotid gland (bovine), calcium/calmodulin-dependent protein phosphatase in, 457-466
 Parvalbumins, interactions with model phospholipid vesicles, 71-79
 Phenothiazide action on red blood cell volume recovery response, 159-169
 Phorbol ester-stimulated pancreatic enzyme secretion, augmentation of, 255-262
 Phosphoinositide-sensitive and insensitive non-mitochondrial calcium pools and modulation of intracellular free calcium, 325-336
 Phosphoinositide-specific mammalian, phospholipase C isoenzymes, 309-323
 Phospholipase C isoenzymes, mammalian phosphoinositide-specific, 309-323
 Phospholipase inhibition, 1-10
 Phospholipid vesicles, interactions with, 71-79
 Phosphoproteins and calcium pump in endoplasmic reticulum of liver, 275-287
 Pituitary cells (anterior), clonal AtT-20/D16-16, calcium and hormone secretion in, 467-476
 Pituitary cells, TRH effects inhibited by calcitonin, 145-149
 Plasma membrane vesicles from rat liver and passive calcium influx, 235-240
 Platelet (human) Ca^{2+} sequestration and protein kinase C, 299-307
 Platelet (human) Ca^{2+} -ATPase, 289-297
 Platelet-derived growth factor, association of $[\text{Ca}^{2+}]_i$ with mitogenesis but not proteoglycan synthesis in chondrocytes - Effect of Suramin, 29-35
 Platelets, $\text{Na}^+/\text{Ca}^{2+}$ exchange mechanism, 101-113
 Potassium chloride mediated insulin release, 441-450
 Probenecid and corrections of Fura-2 measurements, 171-180
 Protein kinase C activation by TPA, 159-169
 Protein kinase C, platelet (human) Ca^{2+} sequestration and, 299-307
 Protein phosphatase in bovine parotid gland, 457-466

Q

- Quantum noise minimization of fluorescent probes by using optimal spectral windows, 527-534

R

- Receptor (brain), inositol trisphosphate, isolation and functional characterisation, 337-342
- Receptor mechanism, cation sensitive (parathyroid), 11
- Receptor-mediated control of calcium mobilization and Inositol tetrakisphosphate, 375-383
- Receptors, cell surface, 1-10
- Red blood cells of bivalve mollusc, hypo-osmotic stress, 159-169
- Ruthenium red and doxorubicin, effects on intracellular Ca^{2+} stores in skinned rabbit mesenteric smooth-muscle fibres, 433-439
- Ryanodine activation of calcium release channel (SR), 63-70

S

- S-100 α_0 protein (cardiac), purification of, 81-92
- Sarcoplasmic ionic calcium concentration in neuroleptic malignant syndrome, 223-233
- Sarcoplasmic reticulum calcium release channel, 63-70 (cardiac), covalent regulation of calcium pump (Review), 397-400
- ionomycin induced calcium release, 125-134
- S-100 α_0 (cardiac) purification, 81-92
- Silver ion activation of calcium release channel (SR), 63-70
- Smooth-muscle fibres (mesenteric), doxorubicin and ruthenium red effects on intracellular Ca^{2+} stores in skinned rabbit, 433-439
- Sodium dependent calcium efflux using fluorometric probes, 47-56
- Sodium gradient influence on calcium levels in platelets, 101-113
- Sodium/calcium exchange mechanism and ionomycin in vascular smooth muscle cells, 125-134
- neutrophils, 115-124
- platelets, 101-113

- squid axon, membrane voltage sensitive, 401-412
- Sperm (bovine) cytoplasmic calcium quantitation using fluorescent probes, 241-253
- Squid axons voltage clamped pulses and calcium entry, 413-423
- internal ionized Ca^{2+} and H^+ changes, 401-412
- Strontium inhibition of inositol trisphosphate induced calcium release in thymocyte microsomes, 451-455
- Suramin, 29-35
- SV40 transformed fibroblast $\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent ATPase, 181-187

T

- Thapsigargin (TG), 213-221
- induced calcium ion transients and manganese ion entry in human neutrophils, 477-490
- Theophylline mediated insulin release, 441-450
- Thymocyte microsomes and inositol trisphosphate induced calcium release, 451-455
- Thyroid status, influence on Ca^{2+} mobilization and amylase secretion in rat pancreatic acini, 551-560
- Thyrotropin-releasing hormone, 145-149
- Tolbutamide, 205-211, 441-450
- Trifluoperazine (TPA) and derivatives, 159-169
- fibroblast $\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent ATPase, 181-187

V

- Vanadate and fibroblast $\text{Ca}^{2+}/\text{Mg}^{2+}$ -dependent ATPase, 181-187
- Vasopressin on calcium in adipocytes, 561-567
- Verapamil, 37-46
- Vesicles, plasma membrane, 235-240
- Voltage clamped squid axons
- changes in calcium entry, pulses in, 401-412
- changes in internal ionized Ca^{2+} and H^+ , 401-412
